

SOPHISTICATED STYLE, SMART ENERGY USE

Domestically, commercially, deck mounted or wall mounted, Stern Engineering offers a complete collection of designed touch free soap dispenser solutions.

Composed of a chrome plated brass body and a peristaltic pump, the complete touch free soap dispensers range is easy to use, reliable, but most importantly, provides a complete germ free and automated environment.

A DESIGNED COMPREHENSIVE BATHROOM EXPERIENCE

In the last few years, an increased demand for a comprehensive touch free bathroom environment has developed, a need for an environment that will rise up to modern design trends, and be pleasant on the eyes as well as efficient. Most importantly, however, the ideal bathroom environment should strive to promote water and energy conservation as well as save on consumables such as soap.

To accommodate that need, Stern has created its soap & water product range consisting of designed deck mounted and wall mounted faucets with matching soap dispensers. With Stern's product range, using a public bathroom once considered to be a daunting experience is now a pleasant, clean one. In addition, the public bathroom has now transformed into a designed environment which steps up the user experience even further.

MOUNTING FRAMES FOR SOAP AND WATER SYSTEMS

Stern's new mounting frame for touch free wall mounted faucets and soap dispenser provides a complete solution. Operated by IR sensor, the system includes mounting support for the washbasin, faucet and dispenser. It is delivered ready for installation with all the required accessories, and is suitable for installations in solid or dry wall construction.
