

**30** YEARS OF INNOVATION

### #1 ENHANCE YOUR WASHROOM WITH A CSABA SOAP DISPENSER

This durable design is perfect for high traffic locations and is easy to install and refill. The Csaba soap dispenser will be released for sale in Q4 2019 and can be ordered as an individual soap dispenser or together with the matching Csaba touch-free faucet. The Csaba achieves the ultimate modern look and feel in line with today's commercial restroom designs and can be used with non-proprietary soap for maximum savings.

### #2 CONNECT A THERMOSTATIC MIXING VALVE

This high quality, lead-free, brass, pre-mixing unit is a cost-effective thermostatic mixing valve that allows easy adjustment of hot and cold water to prevent scalding. The Underbasin TMV has been designed for public use and is adjustable both externally and internally. To adjust externally simply rotate the fixed cap to achieve the desired temperature. To adjust internally, simply pop off the cap cover to adjust the default temperature range. Incorporates a thermostatic cartridge that allows connection of up to 4 faucets with a maximum joint flow rate of 12 LPM.

### #3 SELECT YOUR SPECIAL FINISH

Spice up your commercial restroom with our wide variety of colors and special finishes including Stainless Steel (Brushed Nickel), AISI316 material, Matt Black, Satin Gold, PVD Antique Bronze, PVD Copper and PVD Rose Gold. For more information on the finishes available and the relevant products contact your local Stern distributor.
